She gained her experience in career consulting while working as Vice President of Consulting Services for the Global leader in the industry, Right Management & later for Zenith Performance Group.

Her services include helping clients write marketable resumes, teaching job search strategies, and creating a career safety net.

In addition to career coaching services, Robin has also developed programs to help leaders to be more effective. Coaching is a critical development tool for individuals and leaders who want to achieve their true potential. I work with individuals and companies to identify the right coaching program to meet the unique needs of the person being coached. That includes Executives to mid-level managers, new supervisors, and individual contributors being groomed for future leadership roles.
